

# Permit Central

Efficient Road Permit Processing

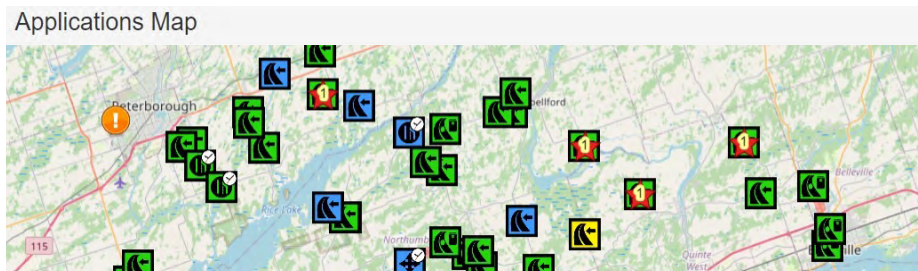

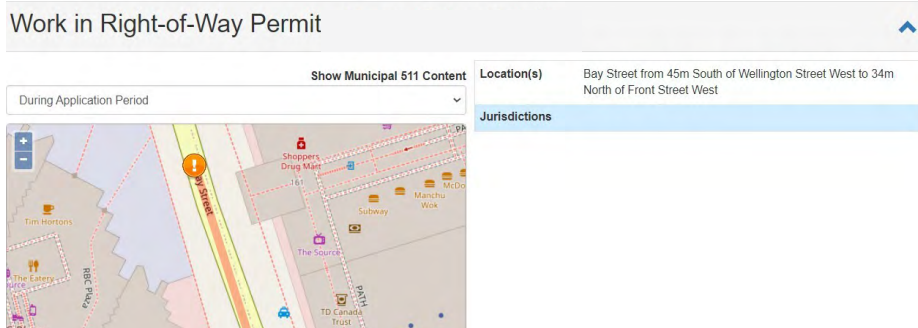

Permit Central is a cloud-based platform enabling online road permit applications, featuring mapping and dashboard tools for efficient permit review, tracking, and management for staff and applicants.

## THE PERMIT CHALLENGE

Traditional permit processes, marked by manual effort and frequent back-and-forth communication between applicants and reviewers, lack efficient tracking and management of permits, leading to increased costs, tying up staff with paperwork, and processing delays.

## THE SOLUTION

Permit Central is a solution designed to facilitate permit applications and enhance communication between applicants and staff, ensuring permits are processed efficiently and effectively. This system is specifically tailored to benefit managers, supervisors, and staff in the road permitting department, as well as anyone who handles PDF forms.

## BENEFITS

- Prevent conflicting road occupancies
- All permits at your fingertips, no more misplaced applications
- Eliminate manual data entry
- Map-based interface
- Municipal511 integration
- Easily get feedback and approvals from other staff
- Integrate with payment systems to offer online / credit card payments
- Communication and change logs
- Automatic approvals of paid permits and creation of certificates

## TALK TO US

Pricing is tiered based on volume of permits. Reach out to us to find out what package is best for your organization today.

## POPULAR PERMITS

- Municipal Consent
